

Our commitment to sustainability

At **Officina Togni SRL**, we are committed with responsibility and dedication to reducing the environmental impact of our activities. For this reason, we have adopted innovative and sustainable solutions that allow us to operate while respecting our planet.

We use 100% energy from renewable sources, actively contributing to the reduction of CO₂ emissions. In addition, the gas used at our plant fully offsets the CO₂ emissions generated by users, ensuring more sustainable and conscious operations.

We firmly believe that every action, even the smallest, can make a difference. We will continue to research and implement new solutions to **improve our environmental impact, with the aim of contributing to a greener and more sustainable future.**

We thank all our customers and partners for choosing to share this journey towards a more responsible world with us.
